132-50	GER Train-the-Trainer Training	4 hours	1	10	\$4,886.65
132-50	GER Administrator Training	16 hours	1	5	\$4,886.65

### **Labor Category Descriptions**

#### **Applications Architect I**

**Functional Responsibilities:** Serve as the lead technical resource providing strategic oversight and planning for applications architecture and design. Coordinates the development of new software system applications; provides technical expertise in software architecture; document and design software specifications for software engineers; produces software prototypes to demonstrate application of design. Analyzes, defines, and documents requirements for data, workflow, logical processes, hardware and operating system environment, and network connectivity, other systems interfaces, internal and external checks and controls, and outputs. Leads development of system prototypes to demonstrate application of design principles. Also assign technical experts for all major project reviews; monitor trends in system architecture and software development and engineering; and recommend training in software development technologies.

**Minimum Education:** Associates Degree

**Minimum Experience:** 1 year of experience

#### **Applications Architect II**

**Functional Responsibilities:** Serve as the lead technical resource providing strategic oversight and planning for applications architecture and design. Coordinates the development of new software system applications; provides technical expertise in software architecture; document and design software specifications for software engineers; produces software prototypes to demonstrate application of design. Analyzes, defines, and documents requirements for data, workflow, logical processes, hardware and operating system environment, and network connectivity, other systems interfaces, internal and external checks and controls, and outputs. Leads development of system prototypes to demonstrate application of design principles. Also assign technical experts for all major project reviews; monitor trends in system architecture and software development and engineering; and recommend training in software development technologies.

**Minimum Education:** Bachelors

**Minimum Experience:** 3 years of experience

#### **Applications Architect III**

**Functional Responsibilities:** Serve as the lead technical resource providing strategic oversight and planning for applications architecture and design. Coordinates the development of new software system applications; provides technical expertise in software architecture; document and design software specifications for software engineers; produces software prototypes to demonstrate application of design. Analyzes, defines, and documents requirements for data, workflow, logical processes, hardware and operating system environment, and network connectivity, other systems interfaces, internal and external checks and controls, and outputs. Leads development of system prototypes to demonstrate application of design principles. Also assign technical experts for all major project reviews; monitor trends in system architecture and software development and engineering; and recommend training in software development technologies.

**Minimum Education:** Bachelors Degree

**Minimum Experience:** 6 years of experience

#### **Applications Architect IV**

**Functional Responsibilities:** Serve as the lead technical resource providing strategic oversight and planning for applications architecture and design. Coordinates the development of new software system applications; provides
